Example of a beamer presentation

Ricardo Pontaza

July 27, 2017

Outline

First slide

This is an example of a slide.

First slide

This is an example of a slide.
If you want to add extra slides, just use the the **frame**
environment, with the **frametitle** command to input your title.

Outline

How to add elements

You can use any *align, enumerate, equation, array* environment, just add their respective packages.

Outline

Bibliography

In order to have a bibliography, modify the .bib file in this project.
For example, let's suppose you want to add an specific book in
your references:

1. Look the book/paper/publication in Google scholar.
2. Next to the match found, there is a *cite* link. Click on it.
3. At the bottom, there is the **Bibtex** style. Click on it.
4. Copy the citation into your .bib file.
5. Run BibTeX on your file to make the linkage to your text.
